

restart_fns::read_chains

restart_fns::read_energies

restart_fns::error
_check

```
graph LR; A[restart_fns::read_chains] --> C[restart_fns::error_check]; B[restart_fns::read_energies] --> C;
```

The diagram illustrates a control flow where two functions, 'restart_fns::read_chains' and 'restart_fns::read_energies', both lead to a common function 'restart_fns::error_check'. The first function is positioned above the second, and both have arrows pointing to the right, which is where the 'error_check' function is located. The 'error_check' function is highlighted with a gray background, while the others have white backgrounds.
