

testing::test_qho_energy

vqmc::vqmc_qho

solvers::qho_energy

```
graph LR; A[testing::test_qho_energy] --> C[solvers::qho_energy]; B[vqmc::vqmc_qho] --> C;
```

The diagram illustrates the dependencies of the `solvers::qho_energy` module. It is represented by a gray rectangular box on the right. Two white rectangular boxes on the left point to it with blue arrows. The top box is labeled `testing::test_qho_energy` and the bottom box is labeled `vqmc::vqmc_qho`. This indicates that the `solvers::qho_energy` module depends on both the testing module and the vqmc module.
