_main_results
```

```
graph LR; A[repo.DicePy.dice_visualise.process_main_results] --> B[repo.DicePy.dice_visualise.load_results]
```

A diagram showing a call from the `process_main_results` function to the `load_results` function. The `process_main_results` function is represented by a white box with a black border, and the `load_results` function is represented by a gray box with a black border. A blue arrow points from the right side of the `process_main_results` box to the left side of the `load_results` box.
